

LigoWave

NFT 2 ac

Product Change Announcement

LigoWave strives to deliver the ultimate user experience and impeccable product functionality. So, as technologies advance, changes are a necessity in ensuring strong overall product performance, function, and practicality. With its solid expertise and know-how within the field, LigoWave will help you through this transition.

LigoWave hereby announces that it is applying changes to the following product and provides relevant product change information:

Altered Product	Description
NFT 2ac	The LigoWave NFT 2ac indoor access point will no longer have a USB port on the back of its casing. This change will not have any impact on the device's functionality or performance.
